*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 16-20 are drawn to plural light sources with support, (LED light engine) classified in class 362, subclass 249.
  - II. Claims 13, 14 and 15 are drawn to a method of making plural light sources with support, (LED light engine) classified in class 029, subclass 592.1 (Electrical device making)

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, invention II, method of making a (LED light engine) has a separate utility and can be used to make electrical illumination devices including connecting cables in vehicle headlights, junction box wiring, elevator wiring and wiring for machinery lighting .

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
